To whom it may concern,

Compton Petroleum recently engaged Synovia to complete a full performance review of our IT department. The knowledge that they uncovered was very useful and has resulted in many positive changes.

Synovia was very effective at bringing to our attention industry knowledge around how others in our peer group operate. By comparing this information to how Compton does business, they were able to provide us with valuable insights and observations into how our company is performing and the ways we can improve.

What impressed me the most was how well they understood our approach to business and how effectively they were able to work that into the context of their recommendations. The Synovia team were responsive and quick to get things done. They used their time wisely and provided us with exactly what we were looking for.

I would highly recommend Synovia to anyone looking to enhance their organization.

Sincerely,

Paul Parzen
Manager IT, Risk & Internal Audit
